## Open projects

Open projects

<https://github.com/correlaid-paris>

## Our events

Hackathons with partners:  
JOGL x CorrelAid Paris 2019  
CRI x JOGL x Correlaid Paris

## Podcast

“About CorrelAid”  
french podcast and  
education

## Education

We work together with Lecturers without borders [www.scied.network](http://www.scied.network), association which connects scientists around the world to schools

## Health data analysis

We work with patients community on analysis of depersonalised data and for creating of free mobile app for patients

## Health and education

We started the project with Ear Care Nepal, association in Nepal which is making screening of children in Nepal

Some of our projects

CorrelAid  
Paris/France

## MyAlGuide project and MonsterMizer project

This is the open-source part of the [MonsterMizer](#).

You can find open-sourced data here: [MonsterMizer Open Data](#).

You can find a first analysis of some of the data and the corresponding open-sourced code here: [first experiment](#).

# CorrelAid Paris on health

## Main project idea:

Visualization and monitoring tools (application) for people suffering from chronic illness

## Data:

Pain recordings from patients in the form of time-series

## Contact emails:

MyAlguide Olivier Mirat (fully managed by Olivier and made with volunteers of CorrelAid)

# Organisation of the team for Cross-chapter Citizen science project

**Organisation:** Citizen science Data analysis project with CorrelAid France x UK

**Team:**

Katharina [katharina.kloppenborg](#)

Vadim [vadimvoskresenskiy](#)

Albrecht [albrecht.mariz](#)

Frank [frankfschlosser](#)

Anna [anna.mogi\\_work](#)

Florence [florence.lopez](#)

Heba Azzam

**Contact emails:**

[muki.haklay](#) (CRI, UCL)

[liubov.tupikina](#) (CorrelAid Paris, CRI)

[frie](#) (CorrelAid)

[Bastian.greshake-tzovaras](#) (CRI, Openhumans)

# Organisation Pipeline

## How do we work?

### Main discussions:

On slack (fast messages)

On email (as exception for concrete direct questions)

### Main data and code:

Github (please send in slack your github handles)

### TODO list (github issues board / trello):

- General data analysis: data cleaning, prep, analysis, visualisation
- Data preprocessing: each city/year can be downloaded from <https://www.inatur>

**Project timeline:** October 2020 - December 2020/ January 2021, ~4 hours per week

**Contact email:** [muki.haklay@cri-paris.org](mailto:muki.haklay@cri-paris.org) (CRI, UCL) [liubov.tupikina@cri-paris.org](mailto:liubov.tupikina@cri-paris.org) (Cofree.p@correlaid.org (CorrelAid) [bastian.greshake-tzovaras@cri-paris.org](mailto:bastian.greshake-tzovaras@cri-paris.org) (CRI, OpenH

# About project on citizen science

**Organisation:** Citizen science Data analysis project

**Team:** 1 team lead, 3 data scientists (one "beginner" position)

**Topic:**

Citizen science is a relatively new type of science. Everyone as a citizen can take part in it. In this project we are working with the data from the Open City Nature Challenge.

There are several questions, which are important for answering for the citizen science community:

## Research questions

RQ1: Can we identify macroscopic laws of citizen science projects so that long term dynamics is different?

RQ2: How does the citizen science community on resources is growing in time?

What drives the community growth (preferential attachment or exogenous factors)?

Current repository and data examples:

[https://github.com/Liyubov/citizen\\_science](https://github.com/Liyubov/citizen_science)

<https://www.inaturalist.org/projects/city-nature-challenge-2019?tab=species>

## Skills we will need:

- (at least basic) experience preparing and manipulating data in Python (Pandas)
  - (basic) theoretical knowledge of machine learning (ML)
  - (at least basic) experience with implementing ML in Python
- 

# Why Citizen Science?

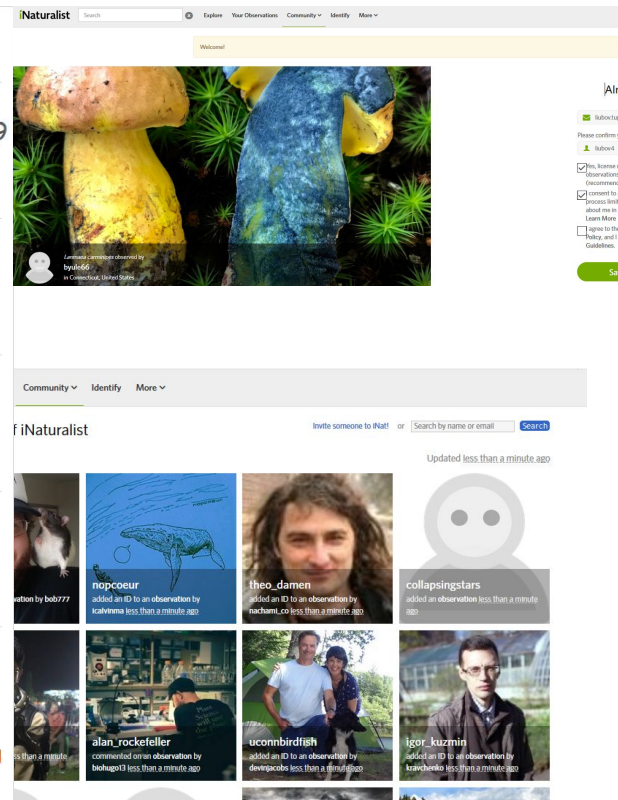

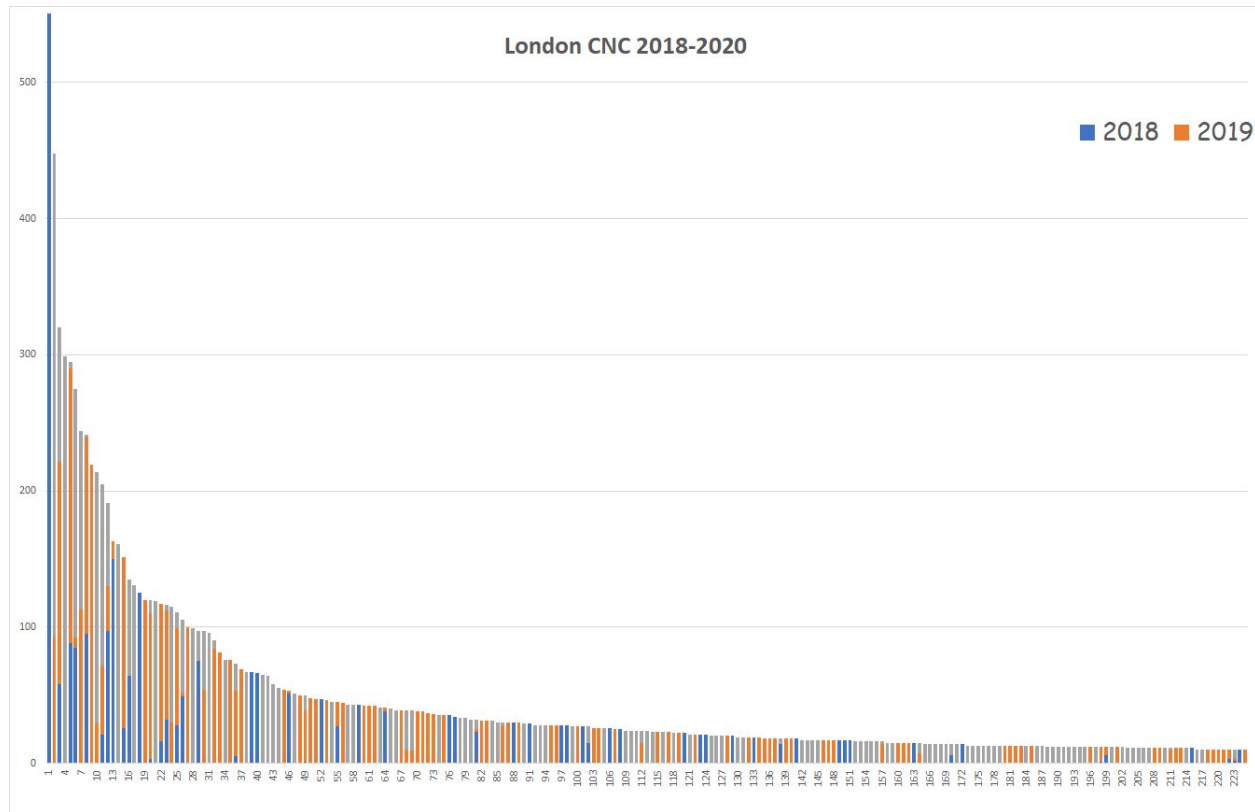

Figure 1. Graph of user and contributions growth to OSM on a monthly basis. The graph shows the accelerating growth in number of users and the rapid increase in data entry measured in track points (source: <http://wiki.openstreetmap.org>).

# City Interaction lab projects

## Project 1

We are currently working together with our partners on analysis of citizen science data from around the globe. If you are happy, join us, fork repository

<https://github.com/cityinteractionlab/>

And explore the open data from iNaturalist and citizen science platforms like SciStarter  
Project is organised thanks to Correlaid Germany and is lead by CorrelAid France (L.Bauer) together with UCL

## Project 2

Project on Researchers mobility with Openhumans and CRI:

Have a look at related publications  
<https://euraxess.ec.europa.eu/worldwide/australia-nz/survey-covid-19-will-have-huge-impact-researcher-mobility-and>
